

Celeste LEBBE

Professor of Dermatology in Saint-Louis Hospital, Paris, France

Celeste LEBBE is Professor of Dermatology in Saint-Louis hospital in Paris, and currently Head of the skin cancer unit in the Department of Dermatology. Professor LEBBE has expertise both in terms of clinical and biological research in melanoma and virus-induced cancers. She has been Principal Investigator in more than 100 clinical trials in the field of dermato-oncology.

She currently conducts translational research. She coordinates Melbase, a national biobank dedicated to advanced melanoma.

Getting to know Celeste LEBBE:

Research interests:

Celeste has particular interest in the field of melanoma, merkel cell carcinoma and Kaposi's sarcoma. She is particularly interested in translational and clinical research on new therapeutic targets in melanoma (EMMPRIN, PDE4, KINDLIN...) and biomarkers of resistance to targeted or immunologic treatment in melanoma.
