

Pr N Basset-Seguin, MD,PHD

Service de Dermatologie
Hôpital Saint-Louis
Paris, France

Biography

Pr Basset-Seguin is an MD PHD who was trained in Faculte de médecine Lariboisière Saint – Louis in Paris and in the Faculte de Médecine de Montpellier, in the south of France. After her residency in Paris, she was quickly interested in research and started her PHD in the States, in the department of K Yancey at the USUHS in close coordination with the dermatology branch directed by S Katz at the NIH. She was recruited as an a medical assistant in Montpellier followed by a position of Assistant Associate in the department of dermatology of Pr Guilhou in Montpellier and was promoted as a Professor in dermatology in Hôpital Saint-Louis (Pr L Dubertert and now Pr M Bagot) since 1998. She continued her research activities and directed an INSERM Unit U 532 in Paris for 5 years. Her medical interest is devoted to skin cancer biology and clinics and most particularly skin carcinomas. She is actually co directing the dermato oncology department in Paris and continues to be involved in research activities in INSERM U976. In 2014, she spend 7 months as a visiting scientist at Genentech, South San Francisco working on resistance mechanism to Vismodegib for the treatment of locally advanced basal cell carcinoma.
