

## **BIOSKETCH of Sanja Kezic**

Sanja Kezic is senior scientist and principal investigator at the Amsterdam University Medical Centres, University of Amsterdam, the Netherlands. Her main research interest centres on the aetiology and prevention of occupational skin diseases including contact dermatitis and non-melanoma skin cancer. Current research projects are focused on the development of non-invasive biomarkers of skin barrier and immune response to assess adverse health effects of occupational exposure to UV-radiation, skin irritants and contact allergens. Furthermore, she is engaged in setting up strategies for the prevention of occupational skin diseases.

Sanja Kezic is the chair of the Section on Occupational and Environmental Dermatoses of the International Committee of Occupational Health (ICOH), and a member of several EU COST Actions.
