

Franck Carbonnel, MD, PhD, is a professor of Gastroenterology at the Université Paris Saclay since 2008. He is head of the Gastroenterology Department at the University Hospital of Kremlin Bicêtre (Assistance Publique-Hôpitaux de Paris). He is specialized in inflammatory bowel disease care and research (clinical, epidemiological and translational). He is also involved in care of patients with enterocolitis due to immune-checkpoint inhibitors and contributed to their description. He investigated the role of intestinal microbiota to predict response and intestinal toxicity of immune checkpoint inhibitors.
